The New Way to Handle Aerial Cable

Distribution systems around the world face 3 critical threats: obsolete thinking, legacy infrastructure, and intensifying storm activity. Hendrix combines a new generation of high performance products with super-responsive service and advanced engineering to answer the challenge.

The proven solution for unreliable circuits – at the lowest total cost

Hendrix Aerial Cable Systems (ACS) offers a complete solution for storm-hardening that delivers value immediately – through reduced outages, low environmental impact and maintenance, lower labor costs, and economic use of internal resources to achieve the lowest total cost.

Service and engineering that shortens design time

Hendrix ACS puts capabilities in the field that increase the speed to design. We have the technology to capture and analyze all the data related to a problem and specify a solution with zero delay. Then we orchestrate the people, products and equipment to deliver a precise, seamless solution.

Hendrix. The storm-hardening experts.

Whenever you face a distribution performance challenge, start a conversation with Hendrix. We will share our expertise and provide the answers you need. And we will maximize system performance at the lowest total cost possible.

Renewable Energy

Hendrix engineering and expertise

Our design engineers will customize a solution for your particular job. Whether you need us to do a full design or design review, we are here to assist.

We're Up to Any Challenge

Six decades of problem solving skills and innovation are activated whenever you call on us. Because Hendrix has such a pool of experience, there are few challenges we haven't encountered and solved.

Hendrix services

We offer responsive engineering and installation support, as well as a detailed final inspection. We also provide trainings and complimentary line inspections of older circuits at no charge. No matter the size or complexity of your job, Hendrix meets any problem with the correct solution for a seamless project from start to finish.

Hendrix products

Hendrix cable is the most reliable in the field. Nothing outlives or outperforms it. Our ACS components include a wide range of products. The Hendrix spacer cable system and all hardware and accessories are designed for electrical and mechanical compatibility and are stronger and easier to install than traditional systems.

The Hendrix Difference

Hendrix offers a complete solution, or a customized subset of products and services that solves the problem a customer faces.

- **Increased Reliability**
- **Improved SAIDI & SAIFI Indices**
- **Withstands Harsh Environments**
- **Multiple Circuits on a Single Pole**
- **Improved Voltage Reduction by 20%**
- **Unlimited Span Lengths**

Ideal for express circuits. Hendrix Aerial Cable Systems can improve downstream voltage by approximately 20%.

Hendrix provides fully supported aerial cable solutions for 15kV, 25kV, 35kV, 46kV, 69kV and 115kV.

Our goal is to maximize system circuit reliability and installation efficiency. We offer a complete solution, or any customized subset of products and services that achieves this goal.
