

Hendrix ImpactAlert™ – Powered by Atomation enhances grid reliability with real-time impact detection. Seamlessly integrated with Hendrix Spacer Cable Systems, this advanced monitoring solution alerts utilities to disturbances like vehicle collisions, extreme weather, or falling debris. By enabling rapid response, utilities can minimize disruptions, enhance safety, and optimize grid performance. Built for durability and precision, Hendrix ImpactAlert™ helps utilities boost efficiency and deliver uninterrupted power to customers.

Alerts utilities
to disturbances
in real time

Ensures grid
stability and
proactive response

Designed for
Hendrix Spacer
Cable Systems

Reduces downtime
and maintenance
costs

- Scales to any Grid Size
- Plug and Play Deployment
- Unlimited Authorized Users

100% Visibility:
*Instant, Team-Wide
Alerts*

YOU INSTALL

You install by easily
attaching the atom to
the messenger cable

ATOM LEARNS

Atom learns what
normal is and
monitors anomalies

ATOM RELAYS

Atom communicates
wirelessly when
necessary

YOU KNOW

You know what's
happening across
your system
