

# COMPACT TRANSMISSION SOLUTIONS THAT REDUCE COSTS, ACCELERATE TIMELINES, AND MINIMIZE LAND USE

Marmon Utility's **compact transmission construction system** streamlines power delivery with efficiency and innovation. By leveraging existing Right-of-Way (ROW), it eliminates permitting delays, reducing project timelines by up to 50%. Its system design requires shorter poles and a smaller land footprint, cutting environmental impact and costs. With optimized part bundles and simplified project management, Marmon Utility delivers USA-built quality, reliability, and sustainable solutions for modern transmission projects.

69kV TO 138kV  
TRANSMISSION SOLUTIONS

## Fast-Track Projects, Utilize Existing ROW

7-14 Years

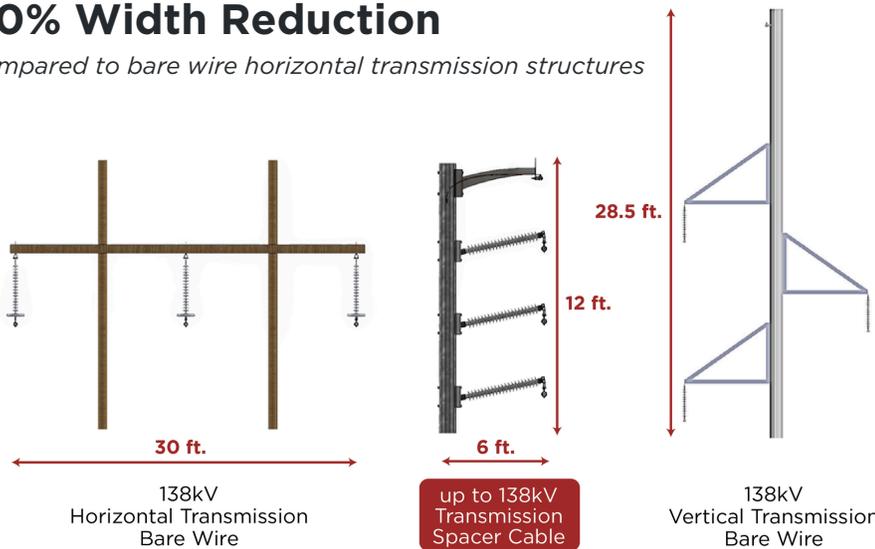

⚡ 2-3 Years

Establishing New ROW

Upgrade Utilizing Existing ROW

## 70% Width Reduction

*compared to bare wire horizontal transmission structures*

ADD CAPACITY TO  
EXISTING RIGHT-OF-WAYS
