

Overview

This guide provides step-by-step instructions for properly installing a gain base onto a pole

Materials Needed

- Line Post Insulator
- Gain Base
- $\frac{3}{4}$ " Stud and Bolt
- (2) Attachment hardware to secure onto pole (not provided)

Installation Steps

Step 1: Assembly

Place line post on center hole of gain base - Orient and tighten the line post to the gain base using the stud and bolt on the Gain Base.

Step 2: Predrill holes

Predrill holes into the surface that the gain base will be secured to.

Step 3: Install Gain Base onto Crossarm

Begin by aligning the Gain Base and line post assembly with the predrilled holes. Install attachment hardware to secure the Gain Base to the surface.

First tighten the top bolt in the Gain Base and then tighten the bottom bolt to secure in place.

**If needed, additional adjustment may be possible to the direction of the Line Post after the Gain Base is installed to the pole.*
